Directors' Review

I am pleased to present the Directors' Review together with the Condensed Interim Financial Information (un-audited) of your Company for the first quarter ended 31 March 2015.

According to State Bank of Pakistan, there are continuing signs of improvement in the national economy. A number of economic indicators are moving in a favorable direction. Headline CPI inflation continues to follow a downward trajectory and is expected to be lower than the annual target of 8.0%. This has provided SBP further room to cut the policy rate by 50 basis points from 8.5 percent to 8.0 percent in the month of March 2015 which is likely to encourage investment. At the same time, the country's foreign exchange reserves are at a record level.

After growing by 2.2% in Jul-Jan FY15, Large-scale Manufacturing is likely to gain traction due to recent cut in policy rate and low prices of raw materials. In the agricultural sector improved outcomes are expected due to farmer incentives, increasing workers remittances and lower global oil prices have reduced the current account deficit resulting in a stable foreign exchange market and higher foreign exchange reserves. However, the circular debt coupled with energy shortages still pose a challenge to the national economy.

Despite lower prices of gas products and lower demand compared to the same period last year mainly from Oil & Gas, Ship-breaking, Distribution and Healthcare sectors, your Directors are pleased to report that the Company achieved the same Net sales turnover, of over Rs 1billion for the first quarter ended 31 March 2015, as compared to First Quarter last year. This was mainly due to improved plant productivity and efficiency and focus on the newly introduced Linde brand of welding electrodes, the Matador-47, along with the Matador brand of cutting & grinding disks which have been positively received by the market and will continue to grow over time.

The Company has also increased its emphasis on application development for value addition through production efficiencies in various industry sectors including refineries, steel manufacturers and food & beverage. Likewise renewed focus on special gases, refrigerants, pipeline business and welding solutions is expected to continue to improve differentiation of Linde versus competition.

Effective cost reduction measures continued during the quarter under review and net overheads decreased 2% over the corresponding period last year. After taking into account an increased finance cost of Rs 36.8 million, profit after tax stood at Rs 37.7 million and an EPS of Rs 1.51 for the quarter.

Apart from the above, the Company also managed its funds and working capital efficiently and diligently during the quarter under review. As a result of effective cash management, Company generated a healthy cash inflow of Rs 116 million from operations as compared to cash inflow of Rs 64 million during corresponding period last year. Owing to the efficient cash management, Company has net cash and bank balances of Rs 22 million (i.e. cash and cash equivalents) as at 31 March 2015 against net bank overdraft of Rs.36 million as at 31 December 2014.

Your Directors are confident that the Company will continue to successfully face the tough competition and other significant challenges during the year.

On behalf of the Board
